

High Light Houseplants

More light provides more food for plants, you just need to be careful of the intensity of the light for certain plants. Most homes don't provide a full days worth of light but a bright room is enough for a plant to be happy and thrive. Higher variegation and repeat blooms occur with higher light.

What is high light?

- South or West facing window up to 4-6 feet max. Be careful of direct rays hitting foliage, this can cause burning. A light weight sheer covering the window is good way to create indirect light.

Below are plants that require or thrive best with high light:

- Alocasia
- Amaryllis
- Anthurium
- Aphelandra
- Aralia
- Areca Palm
- Autograph Plant
- Banana Plant
- Begonias
- Bird of Paradise
- Bromeliad
- Cacti
- Caladium
- Cardboard Palm
- Carnivorous Plants
- China Doll
- Clivia
- Colocasia
- Cordyline
- Croton
- Cyclamen
- Dieffenbachia
- Dracaena
- Euphorbia
- Ficus spp.
- Ficus Ginseng
- Fishtail Palm
- Fittonia
- Gardenias
- Ivy
- Jasmine
- Lipstick Plant
- Metallica Palm
- Pachira
- Peperomia
- Phalaenopsis
- Philodendrons
- Pilea
- Ponytail Palm
- Pothos Hoya
- Rhaps Palm
- Sago Palm
- Sansevieria
- Schefflera
- Senecio
- Spider Plant
- Stephanotis
- Succulents
- Syngonium
- Tradescantia
- Yucca
- ZZ Plant
